

I have a lot of good reasons for taking care of my cholesterol.

When you build a lifetime with someone, a heart attack affects your whole world. That's when we found out diet and exercise hadn't lowered my cholesterol enough. So as I was recovering, we asked my doctor about adding ZOCOR. He said ZOCOR, along with diet, could really lower my cholesterol — and it's working. Now my cholesterol is right where it should be. And we have a lot to look forward to.

ZOCOR is an effective medicine that along with diet and exercise can significantly lower total cholesterol. A clinical study among people with high cholesterol and heart disease found 42% fewer deaths from heart attack among those taking ZOCOR.* One tablet, taken once a day, can help people with high cholesterol and heart disease live longer, healthier lives.

Important considerations: ZOCOR is a prescription medicine and isn't right for everyone, including women who are nursing or pregnant or who may become pregnant, anyone with liver problems, and people who are allergic to any ingredients of ZOCOR. Unexplained muscle pain or weakness could be a sign of a rare but serious side effect and should be reported to your doctor right away. Your doctor may do blood tests before and during treatment with ZOCOR to check for liver problems. To avoid serious side effects, discuss with your doctor medicine or food you should avoid while on ZOCOR (see details immediately following this ad).

Ask your doctor if ZOCOR is right for you. For more information and the free *Guide for Managing High Cholesterol*, call 1-888-MERCK-68 or visit zocor.com.

ZOCOR. More than 10 years of experience and 120 million prescriptions filled.

YOUR RESULTS MAY VARY.

PLEASE READ THE ADDITIONAL INFORMATION ABOUT ZOCOR IMMEDIATELY FOLLOWING THIS AD.

*42% reduction based on 111/2,221 (ZOCOR) vs 189/2,223 (placebo).
